Experience

Software Developer - Java

May 2025 – Present

Uffizio Commute

- Contributing to Uffizio Commute's mission by augmenting its GPS-based transportation platform.
- Integrating new services, models, and controllers within the Java MVC framework to extend functionality in modules like live GPS tracking, bus scheduling, and commuter alerts.
- Enhancing user journeys by working on safety-critical features such as driver and student monitoring, emergency notifications, and schedule reliability.
- Ensuring robust data handling across the MVC layers to maintain application integrity and commuter safety.
- Collaborating with cross-functional teams and mentors in an Agile environment, while gaining practical exposure to full-stack Java development and product delivery.

Java Developer Intern

Jan – April 2025

It Hub Software Solutions

- Contributing to Java-based web applications by developing modules and working on mini-projects under mentorship.
- Implemented RESTful APIs with Spring Boot and Hibernate to handle data persistence, validations, and seamless communication between frontend and backend.
- Enforced both client-side and server-side form validations for secure and reliable data handling.
- Gained hands-on experience in full-stack Java development and best practices in real-world applications.

Technical Skills

- **Programming Languages:** Java, C, Python, JavaScript
- **Frameworks:** Spring, Spring Boot, Spring Data JPA, Spring MVC, Spring Security, JWT, Hibernate, JDBC
- **Web Technology:** HTML, CSS, Bootstrap, JavaScript, JSP, Servlet, XSL/XSLT, JQuery
- **Databases:** MySQL, MongoDB
- **Tools and Technologies:** Git, GitHub, GitLab, Postman, VS Code, IntelliJ, Eclipse, Maven, Tomcat, Jira
- **Concepts:** OOP, DSA, DBMS, REST API, Agile, Scrum

Projects

Amazon Clone

[Link](#) 

Tools: Java, Spring Boot, Spring Data JPA, Spring Security, MySQL, MongoDB, HTML, CSS, JavaScript

- Designed and developed a responsive frontend replicating Amazon's UI using HTML, CSS, and JavaScript.
- Building secure and scalable RESTful APIs with Spring Boot and Hibernate.
- Enforced authentication and authorization using Spring Security and JWT.
- Leveraging MySQL for structured data and MongoDB for unstructured data storage.

Spring based Web Application

[Link](#) 

Tools: Java, Spring Framework (Spring ORM), Hibernate, JSP, HTML, CSS, Bootstrap, MySQL

- Built a product management system with Spring MVC and Hibernate, streamlining product handling and improving maintainability through the MVC pattern.
- Followed the MVC design pattern to ensure modular architecture, maintainability, and ease of development.

Record Notes

[Link](#) 

Tools: Java, Hibernate, JSP, HTML, CSS, Bootstrap, MySQL, OOP

- Expanded a web application with a robust backend for efficient record management, enabling seamless data persistence and retrieval.
- Ensured data consistency and integrity throughout the application by applying effective error handling.

Education

Government Engineering College, Modasa

2022 – 2025

Bachelor of Engineering in Computer Engineering

- CGPA: 7.24/10.0
