Experience

Associate Programmer

May 2025 – Sept 2025

Uffizio Commute

- Designed and developed RESTful APIs for real-time GPS tracking, scheduling, reporting, and transport workflows.
- Worked with Apache Kafka-based GPS data processing for live location tracking and reporting.
- Rebuilt the WhatsApp notification service and implemented SMS notification services using Termii and SMSLive247, supporting 10–15K alerts per day.
- Implemented caching for frequently accessed SMS, RFID device, and multilingual data, reducing redundant database queries and improving backend performance.
- Developed and optimized backend workflows, including student transfers and data-processing services, and resolved production issues across APIs and real-time data workflows.

Java Developer Intern

Jan 2025– April 2025

It Hub Software Solutions

- Developed RESTful APIs using Spring Boot, Hibernate, and MySQL for backend functionality and data access.
- Implemented API validation and error handling and performed API testing and debugging using Postman to ensure reliable client-server communication.

Technical Skills

- **Programming Languages:** Java , Python, JavaScript
- **Frameworks and Technologies:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, JDBC, JSP, Servlets
- **Databases:** MySQL, MongoDB
- **Tools and Technologies:** Git, GitHub, GitLab, Maven, Postman, Jira, Apache Kafka, JUnit 5, Mockito
- **Core Concepts:** OOP, DSA, DBMS, REST APIs, Microservices, JWT, Agile, Scrum
- **Cloud and DevOps :** AWS, Docker, Kubernetes (Learning)
- **AI and Developer Tools:** Cursor, Claude, ChatGPT

Projects

HonestLens (In-Progress)

[Link](#)

Tools: Java, Spring Boot, Spring Data JPA, Spring Security, MySQL, JavaScript, REST APIs, Maven

- Developing a web-based feedback platform for creating and managing customizable forms with support for anonymous and identified responses.
- Implementing secure user-based form access and response collection using Spring Security and JWT.
- Building automated report generation to analyze submitted feedback and provide structured insights from collected responses.

Amazon Clone

[Link](#)

Tools: Java, Spring Boot, Spring Data JPA, Spring Security, MySQL, MongoDB, HTML, CSS, JavaScript

- Developed a responsive e-commerce application with a frontend inspired by Amazon and RESTful backend APIs using Spring Boot.
- Implemented authentication and authorization using Spring Security and JWT.
- Integrated MySQL and MongoDB for application data storage.

Spring based Web Application

[Link](#)

Tools: Java, Spring Framework (Spring ORM), Hibernate, JSP, HTML, CSS, Bootstrap, MySQL

- Developed a product management application using Spring MVC and Hibernate, implementing CRUD operations and database persistence using the MVC architecture.

Education

Government Engineering College, Modasa

2022 – 2025

Bachelor of Engineering in Computer Engineering

- CGPA: 7.65/10.0
